

CAPABILITIES OVERVIEW

Senior Medical Affairs for **neuroscience** & neuro- diagnostics

Fractional access to senior Medical Affairs leadership — strategy, KOL engagement, advisory boards, and publications — for emerging biotech and diagnostics companies across US and EU markets.

Alexander Arkhipenko, PhD · MSL & Medical Advisor · 9+ years pharma & biotech
Alzheimer's · Parkinson's · MS · rare neuro · imaging & biomarkers

ARKH Advisory

THE GAP WE CLOSE

The senior medical expertise you need, exactly when you need it

Building a credible medical function in neuroscience is hard: KOLs are concentrated, the science moves fast, and advisory boards and publications demand experience early-stage teams rarely have in-house, and can't yet justify hiring full-time. ARKH Advisory closes that gap with a senior partner who has done this inside industry, available fractionally, by project, or on retainer, and tuned specifically to neurology and neuro-diagnostics.

Specialist, not generalist

Deep neuro & diagnostic-biomarker focus. You skip the ramp-up — engagements start productive.

US + EU reach

Relationships and experience across both markets; one partner for transatlantic strategy.

Senior, on demand

Director-level Medical Affairs without the headcount or hiring lead time. Scale by stage.

HOW WE WORK TOGETHER

Three ways to engage

RETAINER

Fractional Medical Director

Your part-time senior medical lead — ongoing strategy, KOLs, advisory boards, publications, on-call judgement. Capped days/month, fixed monthly fee.

FIXED FEE

Project packages

- Medical Affairs strategy & roadmap
- KOL mapping & engagement plan
- Advisory Board in a Box
- Publications & abstract development
- Medical review of materials (MLR / MRC)
- Protocol / development-plan review

DAY RATE

Advisory & overflow

Senior input by the day — expert interviews, ad-board facilitation, congress coverage, overflow for in-house teams and agencies.

Where ARKH Advisory goes deep

If your asset sits in neurology or neuro-diagnostics, this is the consultancy built for it.

Alzheimer's disease

Parkinson's & parkinsonian syndromes

Dementia with Lewy bodies

Multiple sclerosis

Rare neurological disorders

Amyloid & tau PET

DAT-SPECT imaging

Drug development

Diagnostic & disease-monitoring biomarkers

EVIDENCE, NOT ADJECTIVES

A track record you can verify

50+

KOL relationships across US & EU

8+

Advisory boards run end-to-end

200+

Peer-to-peer presentations

6

Peer-reviewed publications

Experience spanning **GE HealthCare**, **MedDay Pharmaceuticals**, **myTomorrows** and **Syneos Health**.

Selected publications

Leuzy A, ..., **Arkhipenko A**, ... Farrar G. Considerations in the clinical use of amyloid PET and CSF biomarkers for Alzheimer's disease. *Alzheimer's & Dementia*. 2025;21(3):e14528.

ABOUT

Alexander Arkhipenko, PhD

A Medical Affairs leader with a PhD in life and health sciences and 9+ years in pharma and biotech, focused on neurodegeneration and diagnostic biomarkers. Built KOL networks across the US and EU, designed and ran advisory boards end-to-end, supported a diagnostic imaging label update, delivered hundreds of scientific presentations, and published with leading experts in journals including *Alzheimer's & Dementia*. ARKH Advisory brings that senior, specialist experience to the companies that need it most: biotech and diagnostics teams who need the medical thinking before they can build the department.

HOW ENGAGEMENTS RUN

1 · Fit call

30 minutes to confirm scope, fit, and the right model. No pitch.

2 · One-page proposal

Clear scope, deliverables, timeline, fixed fee. You approve before work starts.

3 · Senior delivery

Remote-first, async-first, meeting-light, on time.

Let's talk about your neuro program

A 30-minute fit call, no pitch — just whether ARKH Advisory can help, and how.
